

### ANIMAL HEALTH INFORMATION FOR INTRA-COMMUNITY MOVEMENT

VENDOR'S NAME	LOT NO	NAME/ DESCRIPTION

**MUST ACCOMPANY HORSE WHEN PRESENTED AT GOFFS ENTRANCE GATE**

I HEREBY CERTIFY THAT THE ANIMAL DESCRIBED ABOVE:

- (a) has been examined by me today and shows no clinical sign of infectious or contagious disease;
- (b) is not intended for slaughter under a national disease eradication programme;
- (c) has not been vaccinated against African Horse Sickness  
(if the animal has been vaccinated, delete previous line and insert date here \_\_\_\_\_) and does not come from the territory or part of the territory of a Member State of Third Country which is the subject of restriction for reasons of African Horse Sickness;
- (d) has not been obtained from a holding which was subject to prohibition for animal health reasons, nor was it in contact with equidae obtained from a holding which was subject to prohibition for animal health reasons for the following period of time:
  - six months in the case of equidae suspect of having contacted **dourine**, beginning on the date of the last actual contact or possible contact with a sick animal; however, in the case of a stallion the prohibition shall apply until the animal is castrated;
  - six months in the case of **glanders** or **equine encephalomyelitis**, beginning on the date on which the equidae suffering from the disease in question were slaughtered.
  - in the case of **infectious anaemia**, until the date on which the infected animals have been slaughtered and the remaining animals have shown a negative reaction to two Coggin's tests carried out three months apart;
  - six months in the case of **vesicular stomatitis**;
  - one month from the last recorded case in the case of **rabies**;
  - fifteen days from the last recorded case in the case of **anthrax**;
- (e) on the basis of declarations by the owner or breeder, there are no grounds for concluding that the animal has been in contact with equidae suffering from an infectious or contagious disease during the fifteen days immediately preceding inspection.

ARTERITIS (EVA)** 1 swab from Clitoral Fossa taken within 30 days of sale – to be negative for CEM.  
N.B. it takes approximately 7 days to obtain a CEM cert.  
A blood sample taken within 30 days of sale to be negative for EVA.  
Animals that have had a positive result in the first test will need confirmation that a  
second test was taken, and that the result was either negative, or positive with a  
stable or declining titre. N.B. No certificate will mean mares/fillies will not be  
allowed onto the premises.
- FLU VACCINATIONS** 2 primary injections to be given not less than 3 and not more than 13 weeks apart.  
If time permits a booster injection should be given not less than 5 and not more  
than 7 months apart. A further injection should be given every year. Must be  
recorded on Passport. Where vaccinations are not up to date, a notice to that effect  
will be read out at the Sale or the Lot must be withdrawn.

*Consignors of Lots coming from overseas must apply to their Stud Book Authority for Export Certificates to be forwarded to Weatherbys*

*Failure to deliver the necessary documents to Goffs as indicated above may result in the Lot being refused entry, withdrawn from the sale or returned to the Consignor where the Conditions of Sale provide.*
