## VETERINARY CERTIFICATE

**HORSE:** Hong Kong Harry (IRE)  
**MICROCHIP:** 985 1010 4529 1518  
**TRAINER:** Richard Fahey

The above horse was examined by me on 8<sup>th</sup> June 2021

Height: 16hh

Weight: Unknown, no weighing scales available

Signed:

Date: 09<sup>th</sup> June 2021

**Peter Hynes MVB MRCVS Cert Equine Sports Medicine (U.C.D)**

# CERTIFICATE OF VETERINARY EXAMINATION OF A HORSE ON BEHALF OF A PROSPECTIVE PURCHASER

The notes A to G appear on subsequent sections of this certificate

This certificate is supported by:  
The British Equine Veterinary Association  
The Royal College of Veterinary Surgeons  
The Veterinary Council of Ireland  
Veterinary Ireland

## THIS IS TO CERTIFY THAT ON BEHALF OF:

**Name & Address:** Goffs UK, Goffs Uk,, Sandall Beat Rd,, Doncaster,, DN2 6JP,

## I HAVE EXAMINED THE HORSE DESCRIBED BELOW, THE PROPERTY OF:

**Name & Address:** Mr R Fahey, Musley Bank, Malton, North Yorkshire YO176TD

## THE HORSE WAS PRESENTED BY:

**Name:** Callum Pittenburgh

**At:** (Place of examination) Musley Bank, Malton, N Yorks YO176TD

**On:** (Date & Time) 06/06/2021 15:00

## DESCRIPTION OF THE HORSE (See Note A)

### NAME of horse (or breeding)

Hong Kong Harry

### BREED or TYPE

Thoroughbred

### COLOUR

Chestnut

### SEX

Gelding

### AGE by documentation: (See Note B)

4

### Dentition consistent with an APPROXIMATE AGE or AGE RANGE of: (See Note B)

4 - 4 Years

**Passport Number(s):** 372Ire45291518T

**Microchip Number:** 985101045291518

## STAGE OF THE EXAMINATION (See Note C)

During the third stage of my examination the horse was (state type of exercise): Ridden

## ADDITIONAL PROCEDURES (See Note D)

The following specialised diagnostic techniques were undertaken: Radiographs of all joints. Endoscopy of upper airway

No additional report appended

Flexion tests were performed on the following limbs: ALL FOUR LIMBS

Trotting on a small diameter circle on a firm surface was NOT PERFORMED

The reason for trotting on a small diameter circle being omitted: Not suitable for a tb racehorse

A blood sample was taken from the horse during the examination (for medication analysis if required).

## DECLARATION OF PRIOR KNOWLEDGE OF THIS HORSE'S CLINICAL HISTORY (See Note E)

To the best of my knowledge and belief:

1) The seller (or the selling agent) IS a client of my veterinary practice

2) The horse HAS previously been attended by me or my veterinary practice.

3) The horse's veterinary history known to me DOES NOT increase the risk of purchase.

**REPORT OF RELEVANT CLINICAL FINDINGS AND/OR HISTORY**

Bright alert and in excellent condition. Heart and eyes within normal limits. Small sarcoid like lesion on right thigh. Slightly flat fore feet. Left fore fetlock mildly effused. He had a non painful splint on the outside of his right fore cannon. He was sound at walk. He had a quick 'shuffley' action at trot. He resented flexion of both forelimbs, gait was unchanged post flexion test. He was mildly positive to flexion of his left hind pre strenuous exercise. He moved well at his faster paces.. No abnormal respiratory noise was heard during strenuous exercise.

Moved better post exercise, no resentment to flexion of forelimbs and change to gait. Left hind flexion test less of a reaction post exercise.

Full set of radiographs and a videoendoscope are in the repository. This horse has had no surgeries reported.

<b>INSURANCE</b>	Where possible and if required, the prospective purchaser is advised to confirm that they are able to obtain suitable insurance cover before purchasing the horse.
<b>SELLER'S WARRANTY</b>	The prospective purchaser should consider obtaining a warranty from the seller with respect to vices, previous conditions or surgery and other significant information before purchasing the horse. (See note F)

**OPINION OF THE EXAMINING VETERINARY SURGEON (See Note G)**

In my opinion, on the balance of probabilities, the conditions reported above **DO NOT** prejudice this horse's suitability for purchase to be used for Racing.

**Veterinary Surgeon's Signature:**

*Peter Hynes*

**Date of Signature:** 07/06/2021

**Veterinary Surgeon's Name:** Peter Hynes

**Address:** Office 2,, Sycamore Barn,, Angram,, York, YO233PA

## NOTES ON THE EXAMINATION

The "British Equine Veterinary Association (BEVA) / Royal College of Veterinary Surgeons (RCVS) Guidance Notes on the Examination of a Horse on Behalf of a Prospective Purchaser (amended 2018)" establishes a general routine for the pre-purchase examination of horses. The examination is conducted broadly in five stages, although the exact sequence of the various tests within the examination may vary. The five stages are:

- Stage 1 Preliminary examination
- Stage 2 Walk and Trot, in hand
- Stage 3 Exercise phase
- Stage 4 Period of rest and re-examination
- Stage 5 Second trot up

In circumstances where it is not possible to complete all the stages, or where the standard 5-stage examination is limited to just stages 1 and 2 at the specific request of the purchaser, the variations from the standard procedure should be made clear on the certificate.

## NOTES FOR THE PURCHASER

### (A) IDENTIFICATION AND LEGAL OWNERSHIP

This certificate serves to identify the horse that was examined, but it is not the responsibility of the examining veterinary surgeon to ascertain that the declared seller has legal title in the horse. It is the responsibility of the purchaser to satisfy themselves as to the ownership of the horse and to verify the records of any microchip with the relevant database.

### (B) AGE

Without appropriate paper records from foalhood it is not possible to confirm the age of a horse with accuracy. Estimates of age based on a dental examination are imprecise and unreliable and any age range shown on the certificate is approximate and based on opinion only. In the absence of documentary evidence, the term 'aged' may be used to refer to a horse considered after examination to be over 15 years of age.

### (C) STAGES OF THE EXAMINATION

If any parts of the five stages were omitted for any reason (see "Notes on the Examination" above), the opinion given is based purely upon those parts of the examination that were completed. The incomplete examination will not have identified any clinical signs of disease, injury or abnormality that could only have been revealed a part of the standard procedure that was omitted.

### (D) ADDITIONAL PROCEDURES

Any procedures carried out in addition to those recommended in the BEVA/RCVS Guidance Notes (such as radiography, ultrasonography, and endoscopy) are listed. The original records of these procedures (such as radiographs, ultrasonographs, photographs), as well as the blood sample taken for medication analysis, are and remain the property of the examining veterinary surgeon.

Unless specified in additional procedures, this examination does not include examination of the inside of the prepuce (sheath), a detailed mouth examination with a speculum, a height measurement or any examination for pregnancy.

Flexion tests and trotting in a circle on a firm surface are not mandatory parts of the standard procedure, but they can sometimes provide useful additional information about a horse. There may be circumstances when the examining veterinary surgeon concludes that it is unsafe or inappropriate to perform such tests.

### (E) THE HORSE'S CLINICAL HISTORY

If the examining veterinary surgeon is aware of any prior veterinary involvement with the horse, the examination will only have been carried out with permission for disclosure of all of the known clinical history. If the clinical history represents a greater than normal risk of the horse developing future problems (i.e. recurrence or delayed consequences of a prior condition), this should be indicated on the certificate along with an explanatory note. (The horse may nevertheless be suitable for purchase based on a risk/benefit analysis). A horse may have received veterinary treatment beyond the awareness of the examining veterinary surgeon.

### (F) SELLER'S WARRANTY

The opinion provides no assurances in respect of matters that can only be established by a seller's representations to the purchaser. A seller's warranty is a matter between the seller and the purchaser and is not the responsibility of the examining veterinary surgeon. The purchaser should consider obtaining a written warranty from the seller covering, for example, matters such as medical or surgical history, height, freedom from vices, temperament, non-administration of drugs prior to the examination and the horse's previous or existing uses and performance levels.

### (G) THE OPINION

The opinion expressed in this certificate is based solely on the standard procedure of examination recommended by the "BEVA/RCVS Guidance Notes on the Examination of a Horse on Behalf of a Prospective Purchaser (amended 2018)" (as varied by those omitted or additional procedures that are detailed in the certificate). The opinion is subject to the limitations of the examination (see note C above) and provides no assurances in respect of those matters that can only be established by a seller's representations to a purchaser (see note F above).

The horse examined may, at the time of the examination, have been subject to some previously administered drug or medicament having the effect of masking or concealing some disease, injury or physical abnormality that might otherwise have been clinically discoverable.
